for libmu version 0.0.1

common

::describe-function *fn*
::describe-symbol *symbol*
::describe-vector *vector*
describe *T* print type internals
inspect *T* print object internals
 interactive inspector

::spaces *fixnum* pretty print support
pprint *T stream* pretty print object

dotimes (*symbol fixnum*) . *body*
 execute *body* *T*
 times with *symbol*
 bound to the counter

dolist (*symbol list*) . *body*
 execute *body* with
 symbol bound to list
 elements

prin1 *T &rest stream*
princ *T &rest stream*
 print object to *stream*
 with or without escapes

with-open-file *symbol file-spec . body*
 execute *body* with
 symbol bound to the
 stream opened from
 file-spec

format *T string . args*
 formatted output

metrics

room *bool* print heap occupancy
 verbose or minimal

time *T bool* print execution times
 and heap usage for *T*

system

chdir *string* change current working
 directory

current-working-directory
 get current working
 directory

exit *fixnum* exit process with status

logname get user's logname

process-environment
 alist of process environment

system *string* execute system command

utimes process system and user times

repl

repl *ns* enter repl with namespace
